A product of- Jiyo India Sales And Marketing pvt. ltd.

PROBLEM

- More than 5 lakh road accidents occur every year in the country, in which more than 4.5 lakh people are injured and more than 1.7 lakh people die. 60% of the dead are youth which is a big loss for the country.
- If the victim gets the necessary help within the first golden hour immediately after the accident, his life can be saved. Road safety is a serious issue in India, where millions of people are affected by road traffic accidents every year.
- The major causes of accidents include over speeding, careless driving, poor road conditions and lack of awareness.

SOLUTION

Nek Insan, through its innovative and patented safety QR system, immediately sends the information of the person injured in the accident to his family members along with photo, video and location and everyone's location becomes live on the same map. Due to which, by getting proper help on time, the life of the victim can be saved.

CAR SAFETY QR →

← BIKE SAFETY QR

IN CASE OF ACCIDENT

Scanning the QR: Any person, police or ambulance driver can scan the Nek Insan Safety QR fitted on the accident vehicle through the Nek Insan app or any scanner.

Call Connection: As soon as the scan is done, a masking call along with photo/video and location of the accident site is connected to all the phone numbers of the vehicle owner and his family, thereby maintaining data privacy.

Alert Display: This photo/video automatically starts displaying with a siren alert even when their phone screen is locked.

Information Distribution: This information also reaches the nearest parked ambulance, PCR (if tie-up) and Trauma Centre.

Live Location: As soon as the location is joined, everyone becomes live and connected and can track together on the same map.

Quick Help: This procedure provides quick emergency help to the victim, which can save his life.

Wrong Parking

IN CASE OF WRONG PARKING

Even if your car or bike is in a wrong position or blocking the way for others, by scanning the Nek insan Safety QR on it, any person or the police can call the vehicle owner and get the vehicle removed from the way and issue challan or fine to the people. The vehicle can be saved from anger.

OFFLINE IVR CALLS

Even in case of no smartphone/net, an IVR call can be made to the vehicle owner and his family members by dialing the helpline number and extension mentioned on the QR. This call is also masked so that data privacy is maintained.

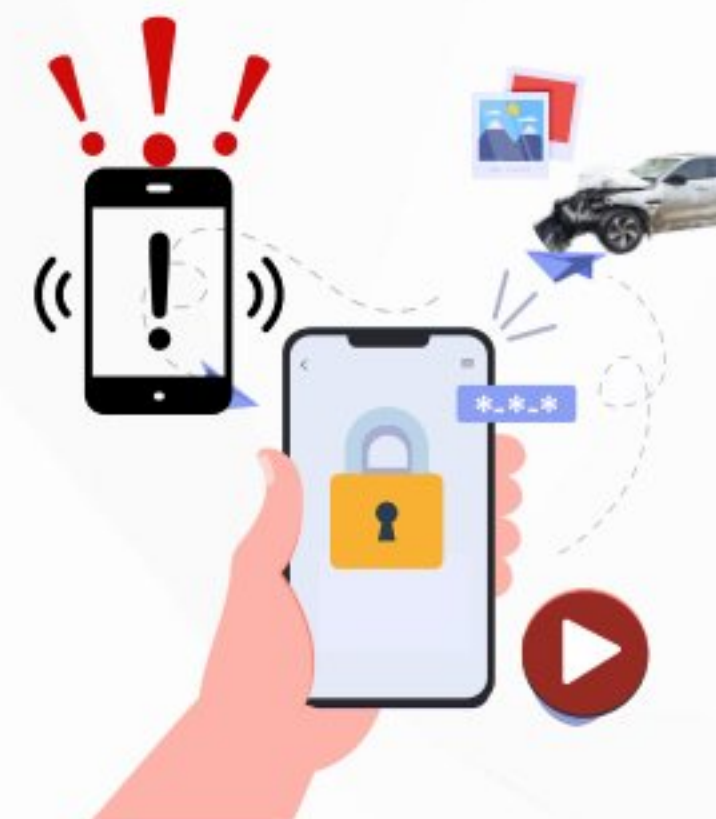

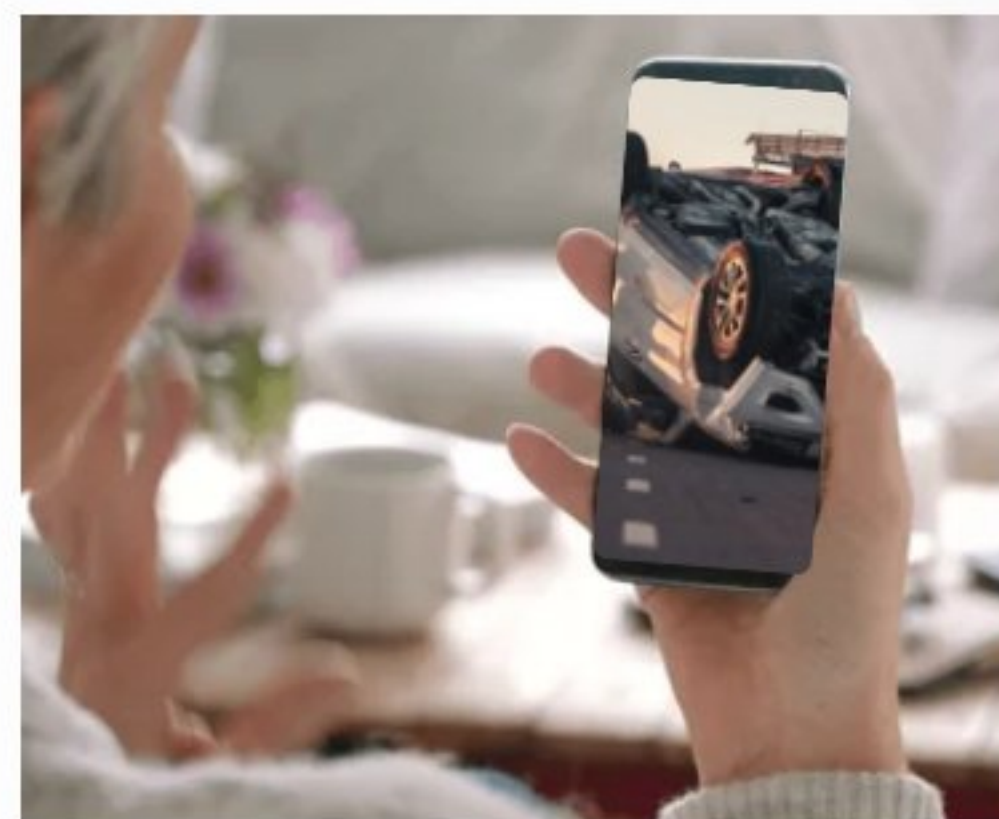

Benefits of Nek Insan Safety QR

Instant Communication: At the time of the accident, the vehicle owner and his family members are immediately informed along with photos/videos.

Emergency Alert: Accident site information is available with alert sound even when the phone screen is locked.

Live Location Tracking: All concerned go live on the same map, thereby speeding up the delivery of assistance.

Data Privacy: The numbers of the vehicle owner/family members remain completely confidential, call masking is done.

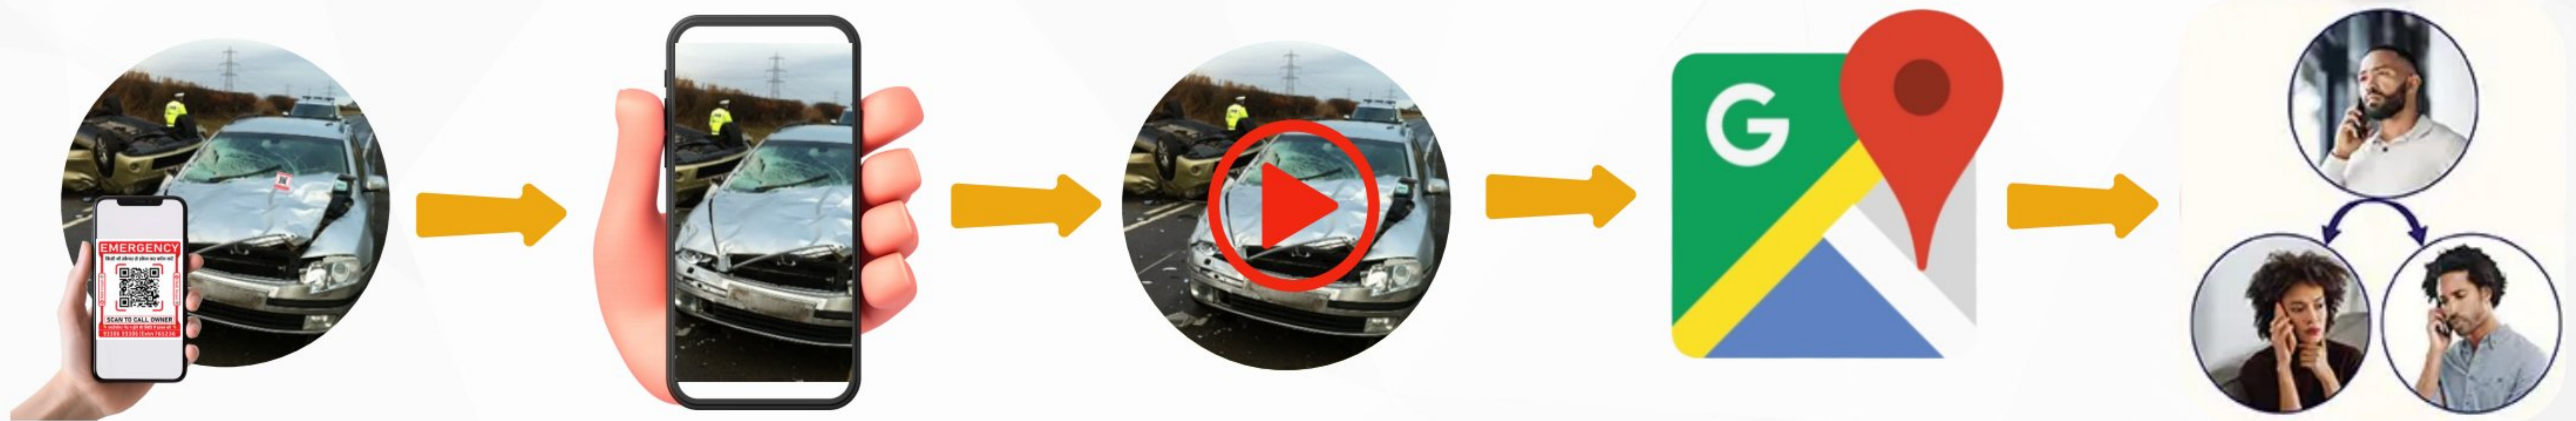

EMERGENCY ALERT

Even if the family members' phones are locked, photos/videos of the accident site along with location automatically start displaying along with an alert sound.

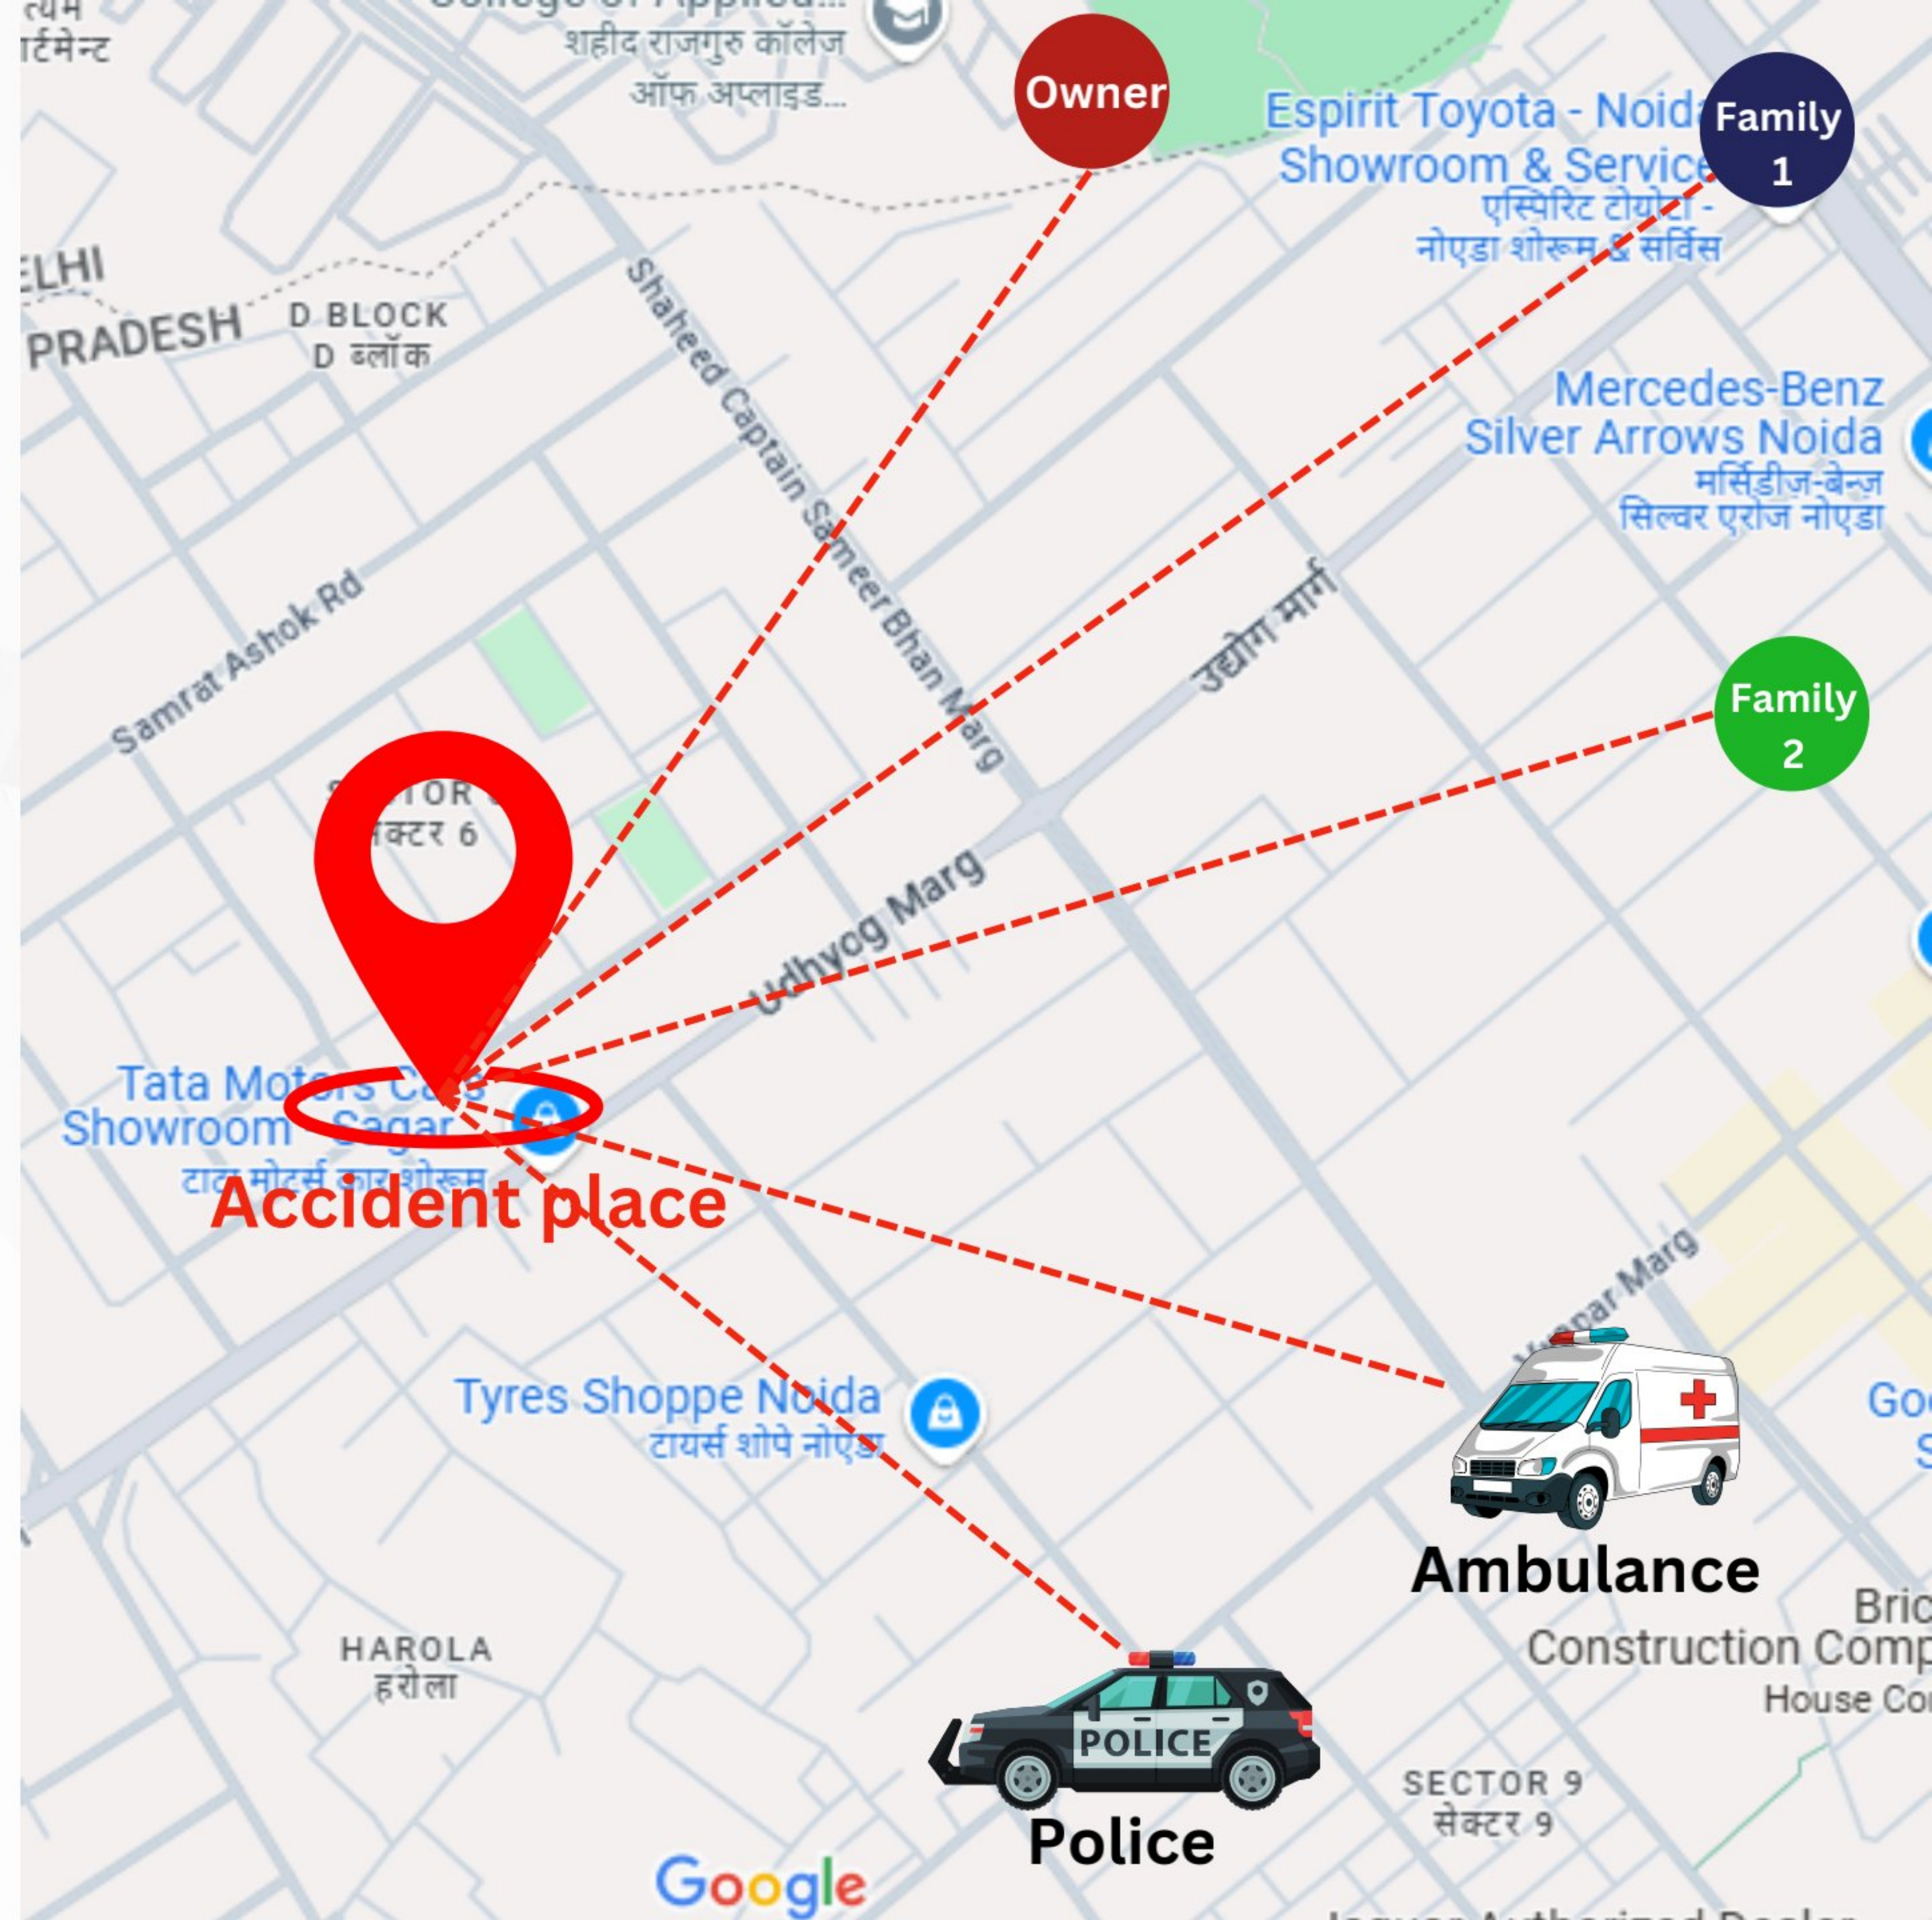

QUICK CALL PROCESS

As soon as the QR is scanned, a call is simultaneously connected to all the numbers of the vehicle owner and his family members along with photo/video and location and everyone's location becomes live on the same map.

LIVE LOCATION TRACKING

All concerned people become live and connected simultaneously on the same map, thereby providing quick emergency assistance to the victim and saving his life.

Why choose Nek Insan Safety QR?

- **Emergency Assistance:** Nek Insan Safety QR provides immediate emergency assistance in case of an accident or wrong parking. On scanning the QR code, the vehicle owner and his family members are instantly notified with photos/videos and location of the accident site.
- **Privacy and Security:** This system directly connects the vehicle owner and his family members without any number sharing, keeping their personal information safe.
- **CONVENIENT AND EFFECTIVE:** Nek Insan Safety QR is easy to use. It can be scanned through any QR scanner or Nek Insan app, allowing quick action in case of emergency.

Why choose Nek Insan Safety QR?

Live Tracking: As soon as the photo/video and location is displayed on the mobile screen, all concerned people become live and connected on the same map, thereby providing quick assistance to the victim.

Additional Features: This system includes SOS call, photo/ video capturing facility and emergency helpline number to provide help in case of any emergency.

Social Awareness: This system not only increases personal safety and mutual harmony, but also spreads awareness about road safety in the society.

SOS

By pressing the SOS button, a recorded emergency message in audio or video format with location can be sent to family members and police, which starts playing with siren alert even when their mobile screen is locked and everyone's location is shown on a map. goes live so they can track you and provide emergency help.

CHILD/ PET SAFETY QR

In case innocent children or pets go missing or lose their way, one can scan Nek Insan's Safety QR and contact the parents along with... photo/video and location.

SMART DOOR BELL

Anyone coming to your door can scan this door bell QR and contact you through video call when there is internet and auto switch audio call when there is no internet, and the person scanning cannot even see you. It also has the facility of IVR call in case you do not have a smartphone, this door bell does not require any kind of wiring, electricity, installation and you can receive video/audio calls from anywhere in your home or office.

SHARE TAP

By tapping or scanning the Share Tape, you can share the profile, your social media account, audio/video, profile, emojis or message as per your wish.

IN CASE OF LOST LUGGAGE

- Nek Insan Safety QR can be applied on your valuables like hand bags, car keys, suitcase trolley, mobile, gadgets, parcel etc.
- If you accidentally lose the above mentioned valuables, any person or police can scan the Safety QR and contact you with photo/video and location to return your goods.
