A product of - Jiyo India Sales & Marketing Pvt. Ltd.

NEK INSAN is an innovative product patented by the Government of India, designed to prevent road accidents by alerting drivers and providing control access to families. In case of an accident, its crash detection system automatically sends audio, video, and location details to family, ambulance & emergency services, ensuring that the victim can receive help within the crucial golden hour. The vehicle is equipped with a QR code, which can be scanned by any bystander to immediately share accident photos, videos, and location details with the victim's family, ambulance services, and police. Also enable family connections through a masked calling system that ensures 100% data privacy.

5. Facility to select and upload emojis and dialogues.
6. Facility to create and upload custom messages.
7. Facility to activate/deactivate the respective icon for sharing as per your wish.
8. Smartest way of data sharing.

KEY DIFFERENTIATORS

- **Patented innovation**
- **Preventive + reactive safety ecosystem**
- **Fast emergency response enablement**
- **Scalable across automotive, residential, and personal safety use cases**

Mission: At Nek Insan, our vision is to empower individuals by providing quick access to critical safety information during emergency situations through innovative QR technology.

Vision: To build a caring and responsible culture by offering smart tools that focus on safety, privacy, and easy communication, in order to build a stronger and safer community.

Technology: At Nek Insan, we create smart safety solutions using QR technology to help people stay safe and stay connected in emergencies.

Presence: At present, we have established a strong presence across PAN India, leveraging an FMCG-driven distribution model to reach individuals at scale. This approach enables widespread accessibility and rapid adoption of our solution across diverse markets.

We are also proud to have crossed **1 million+ downloads on the Google Play Store**, reflecting growing user trust and acceptance of our platform.

WHAT WE ARE TRYING TO DO.

With the help of the Application and integration with Ambulance 108 we are trying to build complete ecosystem. **“From preventing accidents before they happen to ensuring immediate help after they occur, our QR technology creates a seamless shield of safety that protects riders at every moment of their journey.”**

- 1. Reliable Emergency Response:** Ensuring quick and dependable ambulance access during critical situations, including trauma and medical emergencies like cardiac events.
- 2. GPS Pin-Point Accuracy:** Enabling precise real-time location tracking to dispatch ambulances without delays or confusion.
- 3. Beyond Trauma Care:** Extending support to SOS scenarios such as cardiac arrests and other life-threatening conditions with immediate response mechanisms.
- 4. End-to-End Reliability:** Creating a seamless system that connects users, families, and emergency services for faster, coordinated, and trustworthy assistance.

THE COMMON MYTH ABOUT THIS NEK INSAN APP:

While many believe our app is only about preventing accidents and providing support after one occurs, its true purpose is much broader. This technology is designed to be a trusted companion in any panic or emergency situation. Whether it's a trauma incident, a sudden medical emergency, or a fire hazard, the app ensures immediate access to critical services such as ambulance dispatch, PCR, and fire safety teams.

- **Individual Activation, Community Impact:**

While preventive features may benefit an individual user, SOS capabilities like Medical situation, Police, Fire, NHAI, Road Accident, Rail Police, Women Help Line, Child Help Line and Cyber Crime is available for the community.

- **Emergency Support for All:**

In critical situations—accidents, cardiac emergencies, fire, or PCR—help can be triggered instantly, benefiting not just the user but anyone nearby.

- **Network of Safety:**

Each user becomes part of a larger safety ecosystem, contributing to a connected and responsive community.

- **Complete Protection Approach:**

By combining preventive alerts with real-time emergency response, the platform ensures peace of mind and reinforces that help is always within reach.

Our Reach

We are proud to have crossed **1 million+ downloads on Google Play Store**. But for us, this number is not just a statistic—it represents a powerful network of individuals who can extend safety and support to society at large.

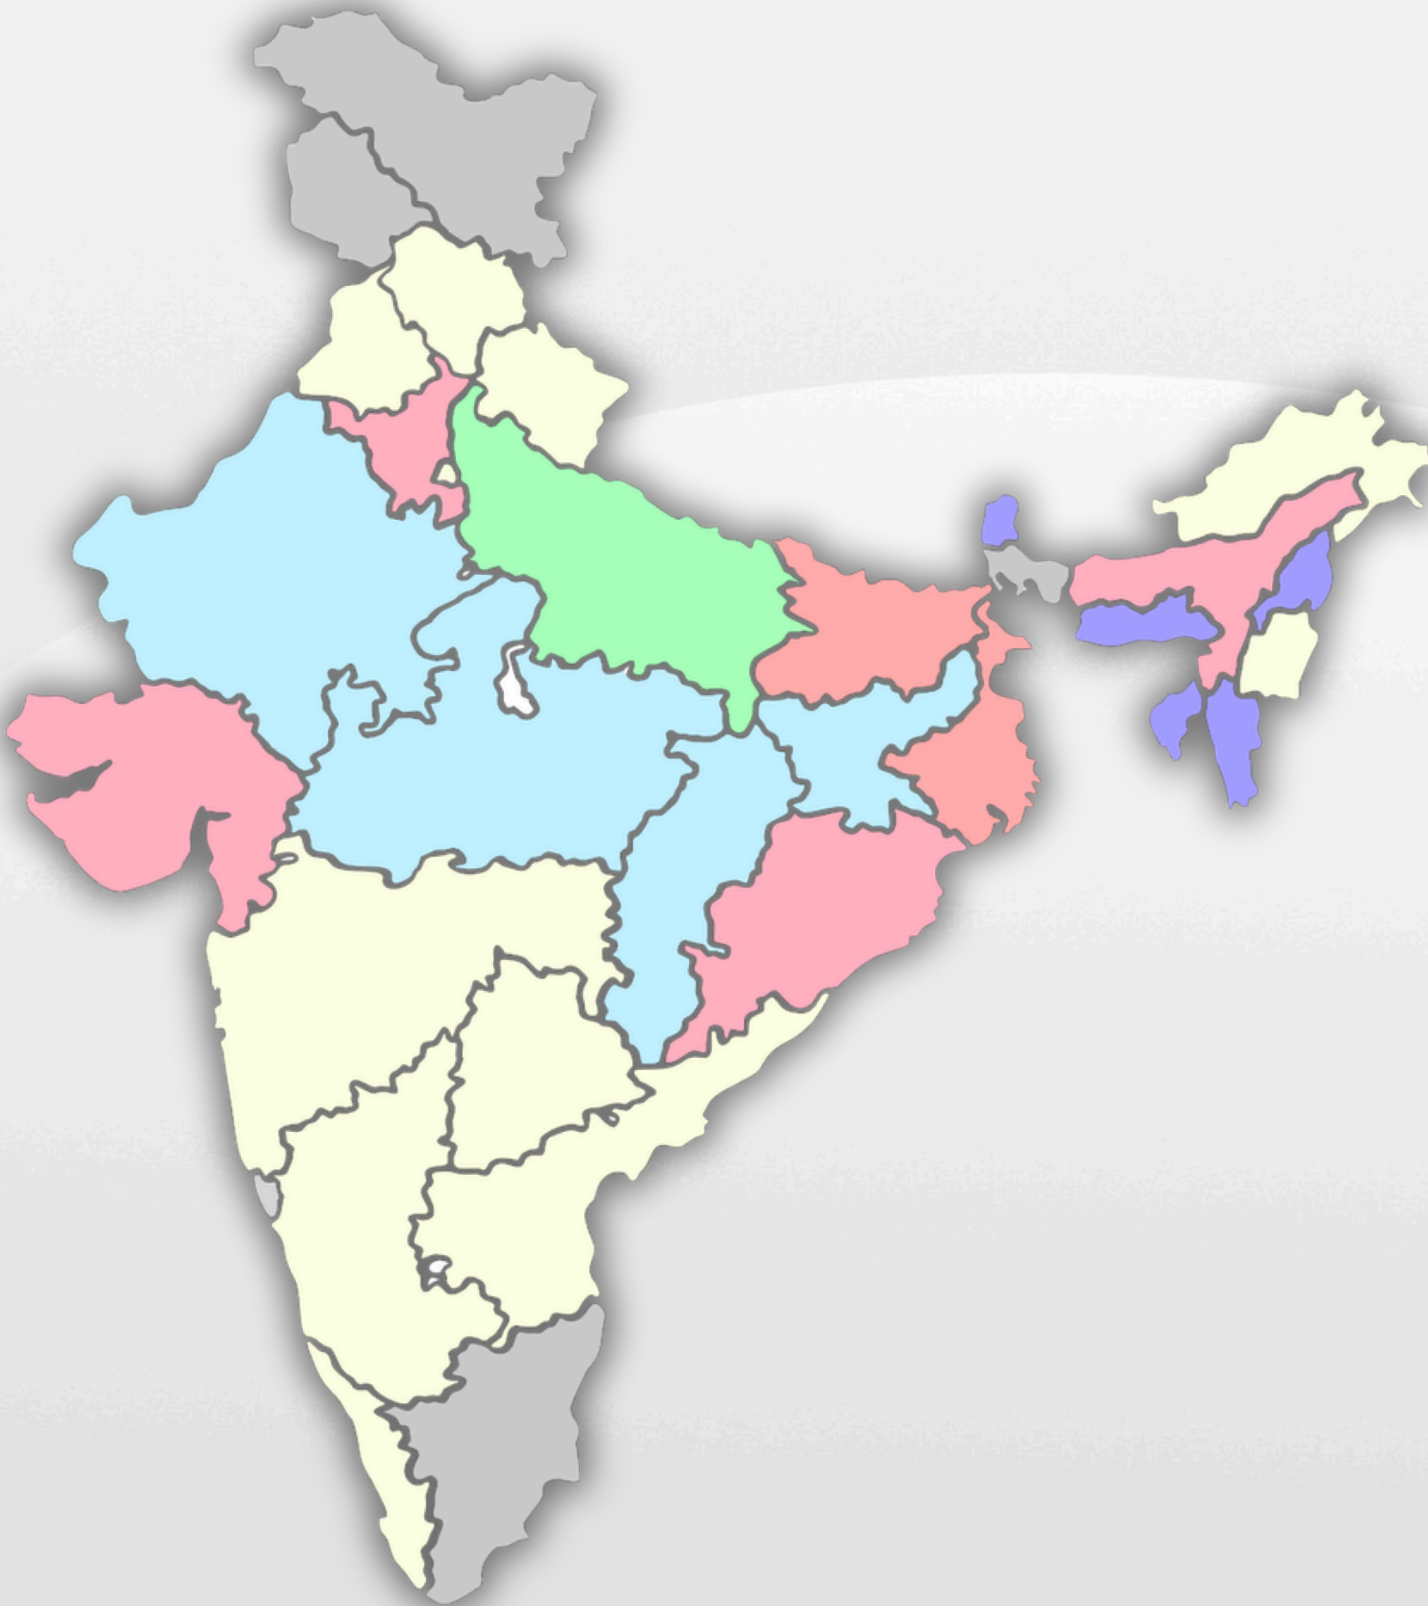

With a single app in the hands of one user, the benefits ripple outward to families, communities, and entire neighborhoods. That means our true impact is not limited to the number shown on the Play Store—it could be **100 times greater**, because every user becomes a potential lifeline in moments of trauma, medical emergencies, or panic situations.

This is the essence of our mission: **to transform individual safety into collective security, ensuring that help is always within reach for everyone.**

EMRI KEY PERFORMANCE INDICATORS:

We are not entirely certain about the exact KPIs being used; however, we assume that your team is being appreciated based on the parameters outlined below.

1. **Response Time:** Speed at which emergency services reach the incident location.
2. **Call Handling Efficiency:** Accuracy, clarity, and timeliness in managing emergency calls.
3. **Fleet Uptime & Availability:** Percentage of ambulances and vehicles operational and ready for deployment.
4. **Coverage & Reach:** Geographic spread and accessibility of services across regions.
5. **Ambulance Utilization Rate:** Effective use of ambulance resources relative to demand.
6. **Cost Efficiency:** Optimizing operational costs while maintaining high-quality service.
7. **Feedback & Satisfaction:** Continuous monitoring of patient, family, and community feedback to improve service delivery.

“At EMRI, performance isn’t just measured—it’s defined by life-saving KPIs that drive speed, efficiency, and trust.”

LOST & FOUND

INSTANT CALL & NOTIFICATION:- Get an instant siren alert with photo/video the moment your lost item is scanned, along with a secure masked call.

LOGS & CALL BACK:- Every notification and scan log shows location, time, caller info, and provides a call-back option.

QUICK RECOVERY:- Instantly connects owner and finder to return valuables faster.

SECURE SOLUTION:- Protects privacy while ensuring safe and smooth handover of lost items.

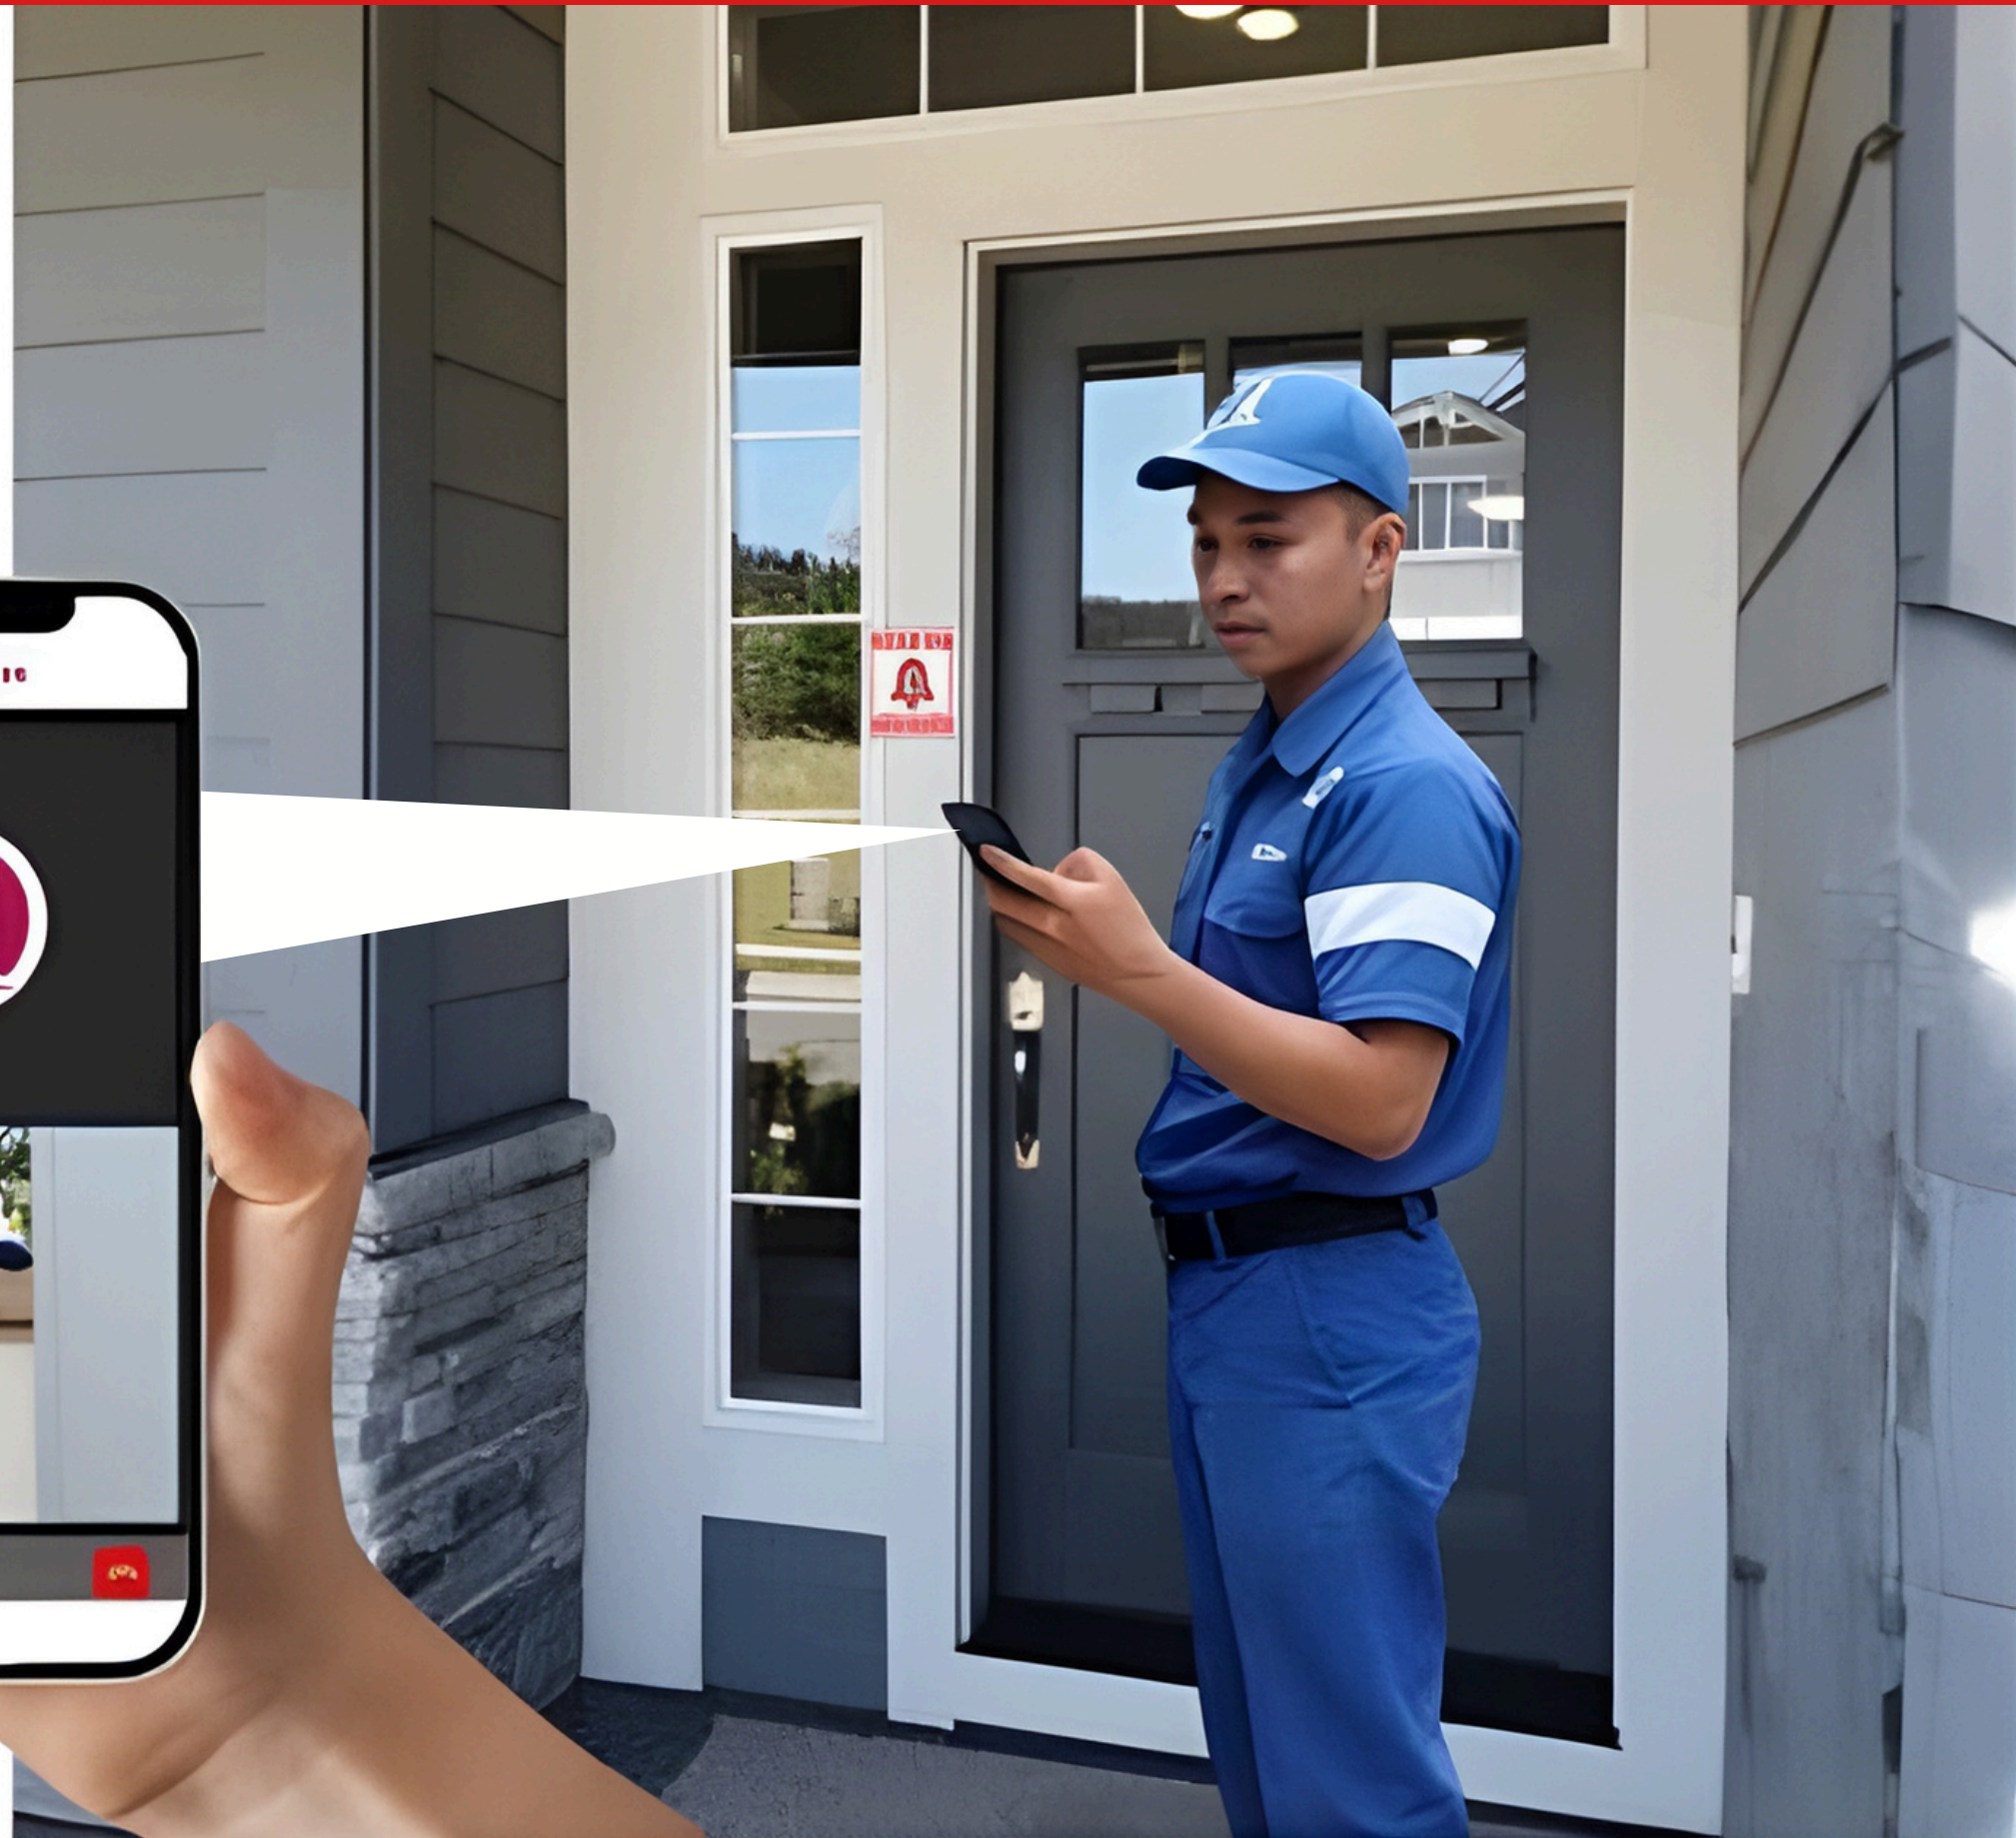

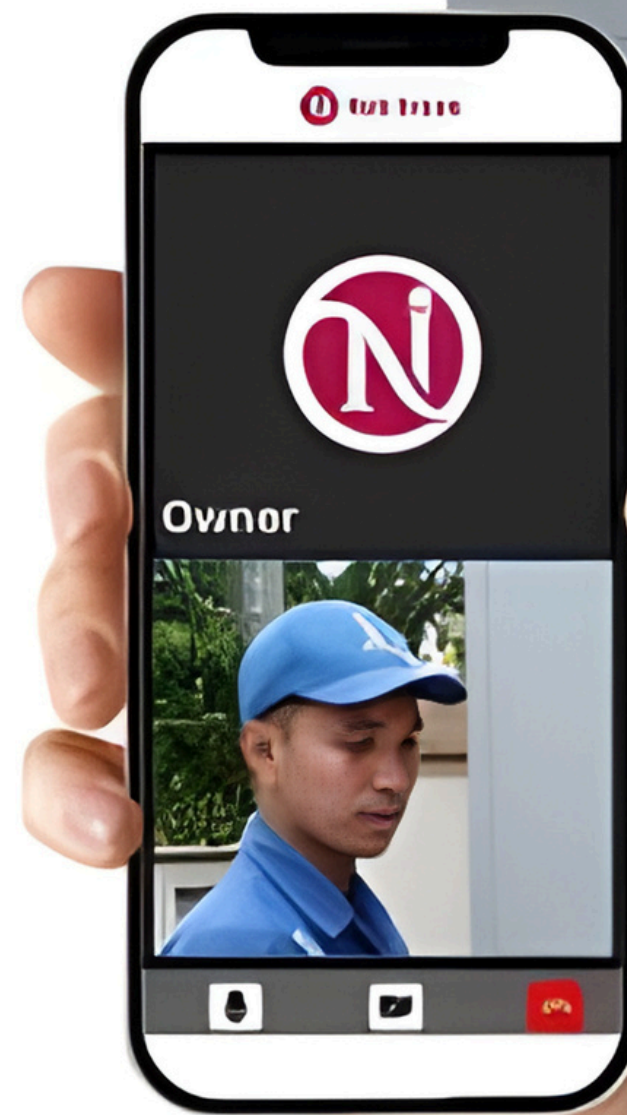

SMART DOOR BELL

When someone scans the QR sticker of the Smart Wireless Video Doorbell:

- If your mobile device has an internet connection, it will connect via a video call, allowing you to see the visitor while keeping your mobile camera off until you choose to turn it on.
- If there's no internet connection on your phone, the visitor's video call will automatically switch to an audio call, connecting through a virtual number while keeping all your numbers confidential.
- If the visitor does not have a smartphone or internet access, they can call the helpline number provided on the sticker and connect to all your numbers simultaneously through an IVR call via a virtual number, ensuring confidentiality.
- Your mobile call logs will include the scanned person's photo, date and time of the interaction, location details, and a call bank button for easy follow-up.

EMERGENCY QR

CAR SAFETY QR →

← BIKE SAFETY QR

QR BENEFITS IN CASE OF ACCIDENT

Scanning the QR: Any person, police or ambulance driver can scan the Nek Insan Safety QR fitted on the accident vehicle through the Nek Insan app or any scanner.

Call Connection: As soon as the scan is done, a masking call along with photo/video and location of the accident site is connected to all the phone numbers of the vehicle

owner and his family, thereby maintaining data privacy.

Alert Display: This photo/video automatically starts displaying with a siren alert even when their phone screen is locked.

Information Distribution: This information also reaches the nearest parked ambulance, PCR (if tie-up) and Trauma Centre.

Live Location: As soon as the location is joined, everyone becomes live and connected and can track together on the same map.

Quick Help: This procedure provides quick emergency help to the victim, which can save his life.

QR USES IN WRONG PARKING

In cases of wrong or obstructive parking, the Nek Insan Safety QR enables direct communication between bystanders and the vehicle owner through the QR scan. This simple intervention not only prevents inconvenience but also reduces the risk of escalation, including fines, challans, or conflicts on the road—promoting responsible road behavior and safer communities.

OFFLINE IVR CALLS

Even in case of no smartphone or no internet, an IVR call can be made to the vehicle owner and his family members by dialing the helpline number and extension mentioned on the QR. This call is also masked so that data privacy is maintained.

SOS FEATURE

By pressing the SOS button, a recorded emergency message in audio or video format with location can be sent to family members and police, which starts playing with siren alert even when their mobile screen is locked and everyone's location is shown on a map. goes live so they can track you and provide emergency help.

WHY CHOOSE NEK INSAN APP & SAFETY QR?

Choose Nek Insan Road Safety QR for your vehicle because it offers a comprehensive, smart solution to enhance road safety and provide immediate emergency assistance.

- **Accident Reduction:** Nek Insan helps reduce accidents by promoting safer driving and timely alerts.
- **Over Speeding Alerts:** Send alerts to drivers & their families whenever the vehicle crosses the safe speed limit.
- **Rash Driving Alerts:** Notifies both the driver and family members if unsafe or reckless driving is detected.
- **Black Spot Alerts:** Warns drivers when approaching accident-prone areas to help prevent crashes.
- **Family Controls:** Family member can record messages, which will automatically play on the driver's phone lock screen for instant guidance and reminders.
- **Crash Detection*** – Automatically detects accidents and sends alerts with Video/ Audio and Location to family, Ambulance and emergency services
- **Road Safety QR Supports:** The project uses Safety QR codes for bikes and cars, which can be scanned at the scene of an accident by any person, police, or ambulance driver. Scanning the QR instantly sends photos or videos of the accident site, along with the location and time, to the owner's family and ambulance services.
- **Wrong Parking Assistance:** Others can scan the QR to notify and contact the owner if the vehicle is parked improperly, preventing fines and towing.
- **No Smartphone, No internet:** An IVR call can be made to the vehicle owner and their family by dialing the helpline number and exten the QR code, with masked calling to protect data privacy.
